horses, elephants, dromedaries, fun-  
ny clowns, tableau wagons and Moth-  
er Goose floats filled with the most  
beautiful and most intelligent per-  
forming dogs in the world.

Rev. and Mrs. J. T. Horger, who  
spent their summer vacation at Dal-  
las and vicinity, returned home on  
Tuesday's afternoon train. Mr. Hor-  
ger reports conditions fairly pros-  
perous around the north Texas me-  
tropolis and as a result of regular  
seasons cotton will yield about one-  
third more per acre than will be  
gathered in this section, while a fair-  
ly good corn crop was made. While  
away Mr. and Mrs. Horger visited  
their daughter, Mrs. Cherry, and fam-  
ily, and their son, Caughey, who  
makes his headquarters in Dallas.

this paper has reached its readers  
workmen will be busy on the job.  
R. W. Speece was awarded the con-

being \$5,574.75, the contract calling  
for the completion of the cement  
work within sixty days—approximate-

Mr. C. J. Peters and sister, Miss  
Della, returned last Saturday eve-  
ning from an auto trip to New Mexico,  
where Mr. Peters went on a pros-  
pecting tour. He took up 640 acres  
of government land near Las Vas-  
quez, and will probably take Horace  
Greeley's advice to "Go west and  
grow up with the country." We  
understand he is very much pleased  
with the land acquired, and will re-  
turn there in November and build  
a shack on his new possessions. Miss  
Peters went with her brother merely  
on a pleasure and sight-seeing trip.

M. E. Bartlett and family and J.  
B. Morrow returned Sunday from  
Eagle Pass where the men finished  
their job of the Alamo Construction  
Co. to build another international  
bridge over the Rio Grande. The  
new bridge is 650 feet in length and  
24 feet in width, which leaves 18  
feet for roadway and 6 feet walk.  
Oscar Schmidt, who also worked on  
the bridge, left Eagle Pass Saturday  
night for San Antonio from where  
he returned to Hondo.

The people of Medina county had  
the misfortune of not seeing the first  
foot race of the season pulled off.  
It was between Judge Blocker and  
C. J. Bless' bull Monday morning at  
11:30. While the Judge was sep-  
arating some cows in Mr. Bless' back  
lot they matched the race. Although  
the poor bull put up a good run, the  
only eye-witness gives Mr. Blocker  
first place and all honors.

Gentry Bros. Famous Shows and  
Wild Animal Arena, which will be  
seen in Hondo Friday, September 1st,  
have many new features, principal  
among which is Miss Annette Delano,  
who, gracefully mounted on a blood-  
ed high school horse, sings with the  
voice of an operatic star, while the  
intelligent animal which she rides,  
rounds the hippodrome track under  
the big arena tent performing its  
splendid repertoire of unusual ac-  
complishments. Miss Delano is  
known as the "Australian Prima Don-  
na Equestrienne," and she more than  
lives up to her title. The climax of  
her performance is reached when  
four score of carrier pigeons, releas-  
ed from all sides of the great tent,  
circle above her head and then flut-  
ter down to perch on her head,  
shoulders, arms and even on the reins  
of her horses neck and back.

The time in which independent candidates can file for a place on the election ticket for the next general election expired Monday night of this week. The candidates are all in now and it will be a free for all from now until November tells the result.

In the second game of the season between Hondo and the Alamo-Peck Indians of San Antonio on the latter's grounds in that city Sunday, Hondo was defeated by a score of 6 to 5, in a hotly contested game. This game closed the season for Hondo's team.

The Anvil Herald office was brightened Saturday morning by a visit from Misses Maggie Langfeld and Mattie Koch and Mrs. Henry Biry of D'Hanis. Misses Langfeld and Koch are the pilots of The Star, the bright journalistic luminary of their burg, and came to Hondo to enjoy the sights of a metropolitan city. Mrs. Biry came along to chaperon the young ladies.

Rev. S. C. Swinney preached at the Del Rio Baptist church Sunday. Rev. Swinney met many good people in the border city, but saw many things "on the road from Mexico" that did not meet the approval of a wayfaring preacher from the quiet, sober precincts of Arkansas.

Inspector E. J. Murray reports that there has been no spread of the charbon in the northern part of the county, and he thinks there is no occasion for further alarm over the disease.

Today is the run-off primary and the issue is Ku Klux or anti-Ku Klux. The nominees of today's primary will be our officials for the next term and the man who fails to register a protest against Ku Kluxism today acquiesces in its anarchistic onslaught upon our constitutional guarantee of a trial by jury, and if taken out by a Ku Klux U. S. Senator, a Ku Klux Lieutenant Governor and a Ku Klux School Superintendent and tarred and feathered as a punishment for conduct not coming under the per-view of organized society, for which he has never been legally accused, nor been confronted by his accusing witnesses in a legally constituted tribunal, then he will be deserving of little sympathy. Strong language? Well, if you can tell us how to put it stronger, come on! Every man and woman who loves and respects our constitutional rights will do his duty today—before it is too late. France had her Jacobins; Russia has her Bolsheviks. Shall America tolerate the Ku Klux? Today may tell.

## ANOTHER DISASTROUS FIRE.

That beautiful two-story home of Frank H. Schweers was completely consumed by fire about 10 o'clock Thursday night. The blaze was first discovered in the ceiling of the front gable and is supposed to have started from defective electric light wiring. The wind was blowing from the south and carried the flames back over the roof and through the attic of the building, and in an almost incredibly short time it was completely destroyed. Most of the household goods were carried out, but much damage will result from breakage in the rough handling.

The building was a comparatively new one and Mr. Schweers' loss will probably not be less than three thousand dollars and is only partially covered with insurance.

The heroic work of Hondo's citizen fire fighters alone prevented the spread of the fire to adjoining buildings, and again several hundred feet of fire hose and a fire plug proved their value in confining the flames to their place of origin.

### WHEELER HANCOCK SHOT.

Luling, Tex., Aug. 21.—Wheeler Hancock of San Antonio was shot through the body with a small calibre revolver this morning on Main Street. The ball struck him in the back and came out of his side after glancing off of a rib. Mrs. Lola Mae Hancock, divorced wife of the injured man, was released on bond after waiving an examining trial following the shooting.—San Antonio Express.

Wheeler Hancock was a native of Hondo, being the son of Mr. and Mrs. Wm. Hancock. He left here with his parents some six or seven years ago. It is possible his wound will not prove of a very dangerous nature.

## LOCKE-CLOSE WEDDING.

Taylorville, Ill., Aug. 16, 1922.—One of the prettiest home weddings ever seen in this locality was that of Miss Corena Locke and Mr. Arthur B. Close, which occurred at her home at 521 North Cherokee Street, at 8 o'clock Wednesday evening.

The home was beautifully decorated. Pink and white being the color scheme, in the south living room the large bay windows were thickly banked with ferns and palms in front of which huge white baskets of pink and white gladiolas, studded with ornamental lights. In this beautiful place the ceremony was solemnized with Rev. G. W. Flagg, the Methodist Episcopal pastor, officiating, using the double ring ceremony.

At eight o'clock Miss Nellie Thompson and Miss Wanita Ricks began the musical program which preceded the ceremony, giving several numbers from well known operas. The bridal procession was formed on the stairway and led by little Miss Betty Duvall, niece of the groom, acting as ring bearer, followed by Ruth Corena Locke, niece of the bride, who acted as flower girl, and scattered rose petals in her path from a flower basket which she carried. Next came the bride, making a rare picture of beauty as she leaned upon the arm of the groom and proceeded to the improvised altar where the officiating minister awaited the party.

Immediately after the ceremony congratulations were extended to the happy pair and refreshments were served in the dining room under the supervision of Mrs. A. J. Rucker, assisted by Mrs. H. A. Burchfield, and the Misses Verna and Gladys Spurling, Wilma Armstrong, Phyllis Johnson and Josephine Gerin. On the table in the dining room stood a huge bridal cake, the cake being made three tiers, iced in designs and surrounded by a white dove. The bride cut the cake and dispensed to all present. The table was decorated in streamers of pink ribbons and sprays of pink roses and arbutus. Refreshments of dainty cakes in shape of pink hearts and pecan roll cake and ice cream in wedding bells shape were also served. Punch was served in the music room during the evening by Miss Ruth Powell, assisted by Forrester and Robert Maley.

The guests from out-of-town were: Mr. and Mrs. D. R. Close and son, Gordon, of Chicago; Mr. and Mrs. G. Duvall and daughter, Betty, of Canton, Ohio; Mrs. Dr. William H. Maley and sons, Forrester and Robert, of Galesburg, Ill.; Mrs. H. L. Garwood, Mr. and Mrs. Herman Garwood and Mrs. Mary J. Duncan, Wm. Garwood, all of Stonington.

The bride's going away gown was of gray canton crepe with hat and veil and accessories to match.

They departed at a late hour amid a shower of rice. Their get-away being well prepared, being conveyed by auto by Mr. and Mrs. Herman Garwood to Decatur, where they boarded the train for Chicago and the Great Lakes, and after a cruise of several days they will return and be at home to their friends in the new bungalow which the groom is now building on West Poplar Street in this city.

The bride is well known in Hondo and has acquired a host of friends through her interesting personality and friendly disposition.

Mr. Close, the bride groom, who has gained prominence in Taylorville, Ill., for the past three years by his ability, both as a teacher of agriculture and assistant principal, has recently been elected superintendent of the school.

## WITH THE DRILLERS.

Considerable activity has marked the week among the oil well drillers, although none of the drills have as yet reached the supposed depth of the oil sand with the possible exception of the Yancey well on the Nixon ranch (the Willie Hill Gas and Oil Company.) This well has been cemented, and is resting, waiting for the cement to set. This well is the deepest in the county, being between 600 and 700 feet. Work on this well will be resumed as soon as the cement sets and interesting reports from this undertaking may be expected at an early date. Some oil has already been encountered in this well.

Reports from the well on the Jungman tract on the Chicoe are meagre, but it is known that considerable oil is showing up. This well has never as yet been put on the pump, and no accurate report as to the amount of oil is available. This, as far as our information goes, is the only producing well in the county.

The Ina Oil Company, on the Geo. Schmidt ranch, had reached a depth of 200 feet up to Thursday morning and the drill was going fine. No obstacles were encountered. The drill in this well passed through a deposit of sulphur at a depth of 169 feet. Barring accident, the drill in this well should penetrate oil sand within the next fifteen or twenty days.

The cable rig that was used in spudding in the well about four and one-half miles northwest of Devine has been replaced by a rotary outfit. The released cable rig has been moved to the Cruseturner farm, and another well in the vicinity of the old lost well will be spudded in just as soon as everything is installed.

The derrick is up on the Bless farm and the driller is waiting on a delayed shipment of machinery to spud in. This well is the closest of the wells to Hondo, and its progress will be watched with keen interest by our people.

Four carloads of well drilling machinery arrived at the Hondo depot this week, but this was a mistake in billing. This equipment should have been billed to D'Hanis, and is intended to be used for developments shortly to be undertaken on the Roth ranch, north of D'Hanis. A Califor-

nia company holds extensive leases in that section.

The new Goodyear Cross-Rib Tread Cord

## A Real Cord Tire for Small Cars at a Popular Price

The new Goodyear Cross-Rib Tread Cord in the 30 x 3 1/2 inch clincher type is a tire that the small car owner will warmly welcome.

It gives him, at a price lower than the net price he is asked to pay for many "long discount" tires, every advantage of quality cord tire performance, for it is a quality tire through and through.

It is made of high-grade long-staple cotton; it embodies the reliable Goodyear quality of materials; its clean-cut tread engages the road like a cogwheel.

The scientific distribution of rubber in this tread—the wide center rib and the semi-flat contour—gives a thick, broad surface that is exceedingly slow to wear.

The tough tread stock in this tire is carried down the side-walls clear to the bead, making it rut-proof to an extraordinary degree.

In every particular it is a representative Goodyear product, built to safeguard the world-wide Goodyear reputation.

Despite its high quality, and the expertness of its construction, it sells at a price as low or lower than that of tires which lack its important features.

The 30 x 3 1/2 inch Cross-Rib Cord clincher **\$12.50**

This price includes manufacturer's excise tax  
Goodyear Cross-Rib Tread Cord Tires are also made in 6, 7 and 8 inch sizes for trucks

 From The Devine News.  
 New Corn Market Opened Here on Monday  
 The ACO Sheller and Elevator opened up Monday for business and about seventy wagons were weighed and shelled out the first day. The price paid was 46 cash, and 48 on account. The corn is not weighing out like the past few years, being much lighter, according to Mr. E. L. Bohl, who presides at the ACO scales. The acreage is also short of last year; and while a good size crop is in sight it will not be the largest, and the low prices will not bring much money.

**Body of Dead Mexican Found Near Big Foot**  
 The body of a young Mexican, about twenty years old, who had apparently been dead about two weeks, was found Saturday afternoon by some Mexican children gathering wild peppers, in a thicket on the Roach farm near Big Foot. The white people did not learn of the affair until Sunday morning. The Mexican was said to be sitting on the ground, hung by his belt over a low limb, his clothing lying a few feet away. The flesh had been eaten away, and had partly fallen off his limbs; and his body was shriveled and dried. Tracks formed a trail, near where the body was found, and he is believed to have been murdered and hung there. Quite a number of Mexican families live near the place, and they pretend to not know anything of the affair. The young man's parents live in Mexico, it is thought. He was identified by his clothing. He was seen on J. R. Bryson's place three weeks ago, since which no one seems to have remembered seeing him. Officers from Big Foot held inquest, and the body was buried on the spot. The grand jury which convenes next Monday in Frio County will investigate.

**Aviator Who Lost Plane and Booze Arrested**  
 According to the San Antonio Light, the officers have arrested the man who lost his plane and booze in the fire at Koenig's farm last week. The whole ring of airplane smugglers may be caught now.

**Morris Resigns as Representative of 77th District**  
 G. C. Morris of Devine has resigned as Representative of the 77th District and Governor Neff has accepted the resignation, to take effect at once. It is only three months until the election when his successor will be elected. Mr. Morris assigned business reasons as the cause of his resignation. He says there is no money in the office; only a lot of advertising and experience for a young man, and while serving as a legislator, he was deprived of transportation, which the railroads give all their attorneys, and he lost quite a lot in this while holding the office.

**Barn and Contents Burned Tuesday Night**  
 The \$600 barn of J. O. Reddus, two miles south of town, burned Tuesday night, just as the crowd was gathering for church before it was hardly dark. About 300 bushels of yellow corn, gathered for farm use, went down in the flames. The fire truck and about twenty cars went out from town. This is the third barn fire Mr. Redus has had. No insurance, and no idea of how the fire started.

**500 Bales Reached Town, Price 22 1-2 Cents**  
 Up to Tuesday night, 413 bales of cotton had been shipped from Devine. About 500 had reached town; 300 of these had been ginned in town and 200 at Big Foot. The price was 22 1-4 cents and up a little. Seeds were quoted at \$33 per ton.

**Mother Sacrifices for Child's Good**  
 The first instance in Devine, we suppose, where a mother sacrificed cuticle from her own flesh to graft upon her child, was made Monday. Dr. Cocherhan took from the flesh of Mrs. Edmond Gardner one dozen small patches and placed the same on the little child's leg, which was bitten by a rattlesnake three weeks ago. The child is well and growing fat, except this place, and the Doctor was afraid it would never heal, except in this way, or if it should heal, the leg would be drawn.

**Building a City at Medina Lake, This County**  
 Commissioner J. W. Roberson spent two days with the Commissioners' Court at the Big Dam, looking after new roads in that section, and one big and two little concrete bridges. Mr. Roberson says the place is growing up rapidly and real estate is on a boom there. It is going to be a great summer resort, and the Court has authorized good roads leading towards Castroville and Devine, and towards Hondo, from the Lake. With some concrete bridges and the roads graded up, it will only be an hour's

run from Devine in a good car.

Eldo McAnelly was in from the ranch Tuesday and said things were a little dry over his way, but thought crops were better than over this way. He has made 600 or 700 bushels of good corn and would get five or six bales of cotton. He moved up his dates two years for the paper.

Judge Noonan and Sheriff Bader were seen on our streets one day this week.

 NOTICE.  
 To my Friends and Patrons:  
 I have moved my office to the second floor of the Hutzler building, entrance stairway of First National Bank.  
 Dr. J. E. Schlottmann.  
 [2 for \$2]  
 Cotton, basis middling, was bringing around 22.25 here Friday.  
 San Antonio's population was materially increased Sunday by the sudden influx of Hondo denizens. Many went down to witness the Hondo-Alamo-Peck ball game.  
 Mrs. Mozell Ferrell and daughter, Miss Elizabeth, of Houston, were here this week visiting Mrs. Ferrell's aunt, Mrs. Bettie Merriwether. They left for their home in the Bayou City this morning.  
 The baseball season is practically over for the year, there being but one more game scheduled on the local diamond. This game will be between the locals and the Eagle Pass team and will be played next month.  
 Word from the hospital in San Antonio where Mr. Fritz Balzen was carried last week for treatment are of the most optimistic character. In fact, there is but little doubt that he will regain his normal health, and he is expected to return home the coming week.  
 O. H. Hector of Alpine and Uvalde visited at the court house here Friday morning, looking over old surveyor's maps of the county. Mr. Hector was deputy county surveyor of Medina county nearly a half century ago. He moved from the county to Eagle Pass in 1880.  
 Business was good with the railroads the past week. Nineteen carloads were handled, nine inbound and 10 outbound, as follows: Outbound 3 cars of milo maize, 2 of corn, 2 of livestock and 2 of cotton seed; inbound, 1 car of coal, 1 of lumber, 1 of flour, 4 of well drilling machinery, 1 of gasoline, 1 of structural steel and 1 of cement.  
 Word was brought to town Friday morning that Mr. E. G. Collier, who was with the road gang north of town, had suffered a severe injury to one of his feet, three toes being severely crushed. We are not advised as to the seriousness of the injury or how it happened, but trust that Mr. Collier will be but temporarily incommoded by the mishap.  
 Mr. Andrea Spratt was brought down from his home near Tarpley Friday morning for medical treatment. While shucking corn in his barn he was struck on the middle finger of his right hand by a very large rattlesnake. Dr. Meyer was immediately called and met the party bringing Mr. Spratt to town, rendered first aid, and brought the patient to the home of his son, Mr. Louis Spratt, where he is receiving the best possible attention. While the old gentleman is a very sick man, but little apprehension is felt for his ultimate recovery.

friends and neighbors. The follow-  
ing neighboring advice comes from a  
Hondo resident.

B. H. Robinson, carpenter, says:  
"I was troubled with my kidneys. I  
had to get up three or four times at  
night to pass the kidney secretions  
which were scalding and highly col-  
ored. I had dizzy spells and black  
specks appeared before my eyes. My  
head ached and I had sharp pains  
through my kidneys. A friend told  
me of Doan's Kidney Pills and one  
box of Doan's regulated my kidneys  
and my back never aches now."

## ARE WE READY TO TURN OUR GOVERNMENT OVER TO KU KLUX?

On August 9th, at Flatonia, Governor James E. Ferguson read from the original the following letter:

"Realm of Texas, Office of the Grand Dragon, Beaumont, Tex., March 22, 1922.—To the Exalted Cyclops: We promised the Klan some time ago that we would endeavor to keep them informed with reference to the character of the men who had announced for public office in this realm in order that we might have our part in improving the personnel of our public servants and to see to it that the governmental reins are kept as nearly as possible in proper hands. At this time our files indicate that Klansman Ed. R. Bentley of McAllen, Texas, is a candidate for the office of Superintendent of Public Instruction. Also Klansman Earle B. Mayfield, at present both of these Klansmen are highly recommended by their local klans, and I do not hesitate to commend them to your serious consideration. I am governing our schools, and I know that the spirit of 100 per cent Americanism will be enhanced with Klansman Mayfield representing us in Washington. Yours in the sacred unflinching bond,  
A. D. ELLIS,  
Grand Dragon Realm of Texas."

This is August 18th and we have seen no denial or effort at denial from either Mayfield or Bentley.

Are we ready to turn our government over to the Ku Klux?

FUNDAMENTAL REVELATION  
in  
DRAMATIC SYMBOL.

By Rev. J. T. Horger.

V.—(continued)

Adam's Three Sons.

In the first chapter on this subject, we held these three sons of Adam to be a God-given, prophetic, symbolic drama, corresponding to, and in harmony with the Triune Godhead, and the Triune manhood, and the Triune Dispensation of salvation, in which we endeavored to waive every phase of this subject except that which is most applicable to the souls of men in a present every day life. Therefore, we set forth Cain, the first son of Adam, as representing the carnal mind, or fallen nature of man. Then Abel, his second born, as representing the spirit-born principle or Divine nature, first in the heart of the infant and second in the soul of the true believer, showing that the conflict between Cain and Abel is a symbolic illustration of the conflict between the carnal mind in the heart of sinners, also in the heart of the merely regenerate, which is plainly taught throughout the New Testament scriptures. Now we want to consider Seth, the THIRD son of Adam, a type of the principle and character to be produced by the third dispensation of the soul of every true believer, namely, that of the Baptism and continued dispensation of the Holy Ghost.

We note that when Seth was born, that his mother rejoiced, saying that "God hath appointed me another seed, in the place of Abel, whom Cain hath slain."

Typically, this means that God has ordained that the regenerate character of the believer, represented by Abel, shall be supplanted by entire sanctification, here represented by Seth.

The most of our churches do not recognize the Holy Ghost Dispensation as it applies to the individual believer, except in some indefinite and superficial sense or manner, which practically amounts to almost nothing.

Much is said of the Holy Ghost dispensation as it applies to the time from the first pentecost after the ascension of Christ to the end of this age. But while such application of the dispensation of the spirit in general is of great value as a background fundamental principle, it brings almost no practicable value by way of an experimental state of grace to the soul. Hence our continued and repeated effort to impress the reader with the all important and practicable proposition of an individual present sense Holy Ghost sanctifying dispensation of the soul.

Turning to Genesis 9:27, we have the same fundamental truth, as that represented by Seth, taking the place of Abel, viz: "God shall enlarge Japhet, and he shall dwell in the tents of Shem."

In evidence that Seth was a type of the Holy Ghost dispensation, both as to the Church as a whole in this age, or still more important, as it applies to the individual; we note that no bleeding sacrifices are mentioned in connection with his worship, nor that of his posterity until after the flood.

Just as Jesus had carried the CHURCH through the dispensation of the father, and that of his own, and thence, by way of the baptism of the Holy Spirit, into the third and last dispensation—that of the Holy Ghost—and then the bleeding sacrifices ceased forever. Even so, it is with the INDIVIDUAL. Each, to be fully saved, must pass through the dispensation of the father, then that of the son, and thence into that of the spirit. Now note that the dispensation of the son is the state of regeneration in which the carnal yet lives and wars against the new-born nature, wherein we are required to put the carnal mind, our old man, on the cross and there let him bleed until, by faith, we receive the Baptism of the Holy Ghost and Fire, that "our old man may be destroyed," "by baptism into death," "that henceforth we should not serve sin."

So it is when the soul has reached the THIRD dispensation by way of the baptism of the spirit, the war within has ceased, and the carnal mind, "our old man," is no more found BLEEDING on the cross, but is crucified, dead and buried by "baptism into death." The bleeding, suffering age of the soul is past, and the soul has passed the last veil, which was rent while Jesus hung on the cross, and entered into the last dispensation—the Holy of Holies—"by a new and living way."

Now, what I am trying to say is, that Seth, the third son of Adam, and his children, are prophetic types of the above described third—Holy Ghost—dispensation of the Church, and ESPECIALLY the sanctified experience of the individual soul. Notice again, that in harmony with this Holy Ghost dispensation, in which the bleeding sacrifices and the

priesthood stage after the order of a carnal commandment is done away the children of Seth, as recorded in Genesis 4:26, began to "CALL upon the name of the Lord." The marginal rendering says "began to call themselves by the name of the Lord." The first rendering signifies that they were types of the true and faithful children of God who pass through the last veil, unto the Holiest of all, where God abides continually, and therefore, they need no human priest to intercede for them, but they, being wholly reconciled to God, call directly upon Him, standing or kneeling immediately before the mercy seat, while the shekina of God's presence in the person and power of the Holy Spirit abide upon, and penetrate the deepest recesses of their hearts; they worship God in Spirit and in truth.

The marginal rendering signifies that those who have reached this third dispensation of the soul, being wholly transformed into the image of Jesus Christ. For the word says, "Both He that sanctifieth and they who are sanctified are all of ONE; for which cause HE is not ashamed to call them brethren." Heb. 2:11. They, in turn are not ashamed to call themselves the true children of God. Now, if you think that the above described condition properly applies to just any old state of Christianity, you ask the church members as you come to them, first, if they are real children of God; and second, if they worship God in the liberty and freedom of the true sons and daughters of God. Then watch their countenance, and note how they will falter, evade, or dodge a direct answer in the affirmative. O, no, Seth's children were not types of the earlier state of salvation, but they represented the children of God in the THIRD dispensation of redeeming grace. Think of it, how often, while in the mere state of regeneration, we are made to feel that there is a veil between us and God, so that we can not get our prayers and thanksgiving through to Him. We feel like some one else can do our praying and worship better than we can. We so often feel weak and blank, without strength and helplessness. But when we are baptised by the spirit and pass into the spiritless state represented by Seth and his children, we enjoy great liberty, freedom and power in the spirit, worshipping God direct in perfect love.

Next we would have you notice that from Seth descended all the righteous that we have any account of, except Abel alone. Enosh, the sixth from Seth, walked with God three hundred years, and was translated that he should not see death. And Noah, the ninth from Seth, found grace with God, and was a just man, and perfect in his generation, so walking with God that He saved him and his household, translating them over the flood in the Ark, and from thence repopulated the earth.

But what of the offspring of Cain, Adam's first born, whom we, in the first chapter on these three sons of Adam, set forth as a God-given type of the carnal mind, the depraved disposition and character of the unconverted and the merely regenerate?

What was the character and life work of his posterity, and where and how did they end?

First, we find that when God had pronounced a curse upon Cain for the murder of his brother, Abel, that great conviction fell upon him, and he cried out in deep agony of soul, "My punishment is greater than I can bear," or "Mine iniquity is greater than that it may be forgiven." Too AWFUL to be endured, to heinous to be forgiven! What a fearful condition the carnal disposition, if let have its way, will lead us into. He then went out from the presence of the Lord, and dwelt in the land of Nod, EAST of Eden. Eastward in scriptures signify retrogression in moral and spiritual life.

Following the descendants of Cain, we find that Lamech, in the sixth generation, took unto him two wives, thus introducing, for the first time on earth, the abominable practice of polygamy. Later, Lamech is found confessing to his two wives that he had killed a young man to his own hurt, saying, "If Cain shall be avenged—punished—seven fold, truly Lamech seventy and seven fold." Alas! He, like Cain, was in many fold trouble of mind and anguish of heart, for the terror of his sins. However, among the offspring of Cain is found Jabel, who was the father of a stock raising tribe. And his brother, Jubal, was the ancestor of a tribe of musicians. And Tubalcain an artificer in brass and iron. Let us notice that the descendants of CARNALMIND-ED Cain were apt in sin and crime, and industrious, wise and expert in the MATERIAL things of earth, but KNEW NOT GOD. As St. Paul would put it: "Aliens from the commonwealth of Israel, strangers to the covenants of promise, having no hope, and without God in the world."

Now let us hear the conclusion of this drama. In Genesis, 6th chapter, we read, "That when the sons of God, the

children of Seth, took to themselves the daughters of men—of the children of Cain—that the days of man was shortened; giants appeared, and the cross between the righteous sons of God and the wicked daughters of men, produced "mighty men of renown in the world."

But listen, the next verse says: "And God saw that the wickedness of man was great in the earth, and that every imagination of the thoughts of his heart was only evil continually." And this grieved the heart of God and He determined to destroy both man and beast and every living thing from off the face of the earth; for the whole world had become corrupt by the sin and wickedness of the adulterated human race.

When the sons of Seth, representing the Church of the present age, joined themselves to the daughters of Cain, who represented the present carnal minded world, they brought about at that time, just as the present flirting and adulterous intercourse of the Church with the ungodly world is now bringing a state of almost universal corruption of the social, commercial, political and ecclesiastical world. And just as that state of corruption paved the way for, and brought on the retributive judgment of a sin-avenging God, in like manner the present adultery between the Church and the world—the result of which is the production of an innumerable host of ungodly, wicked professors of Christianity—is now preparing the way, and awakening the just retributive judgment of a righteous God, who ere long, certainly will visit this corrupt and sin-cursed earth with an awful conflagration which shall burn up His adversaries with unquenchable fire. Just as the souls of men are washed by the waters of regeneration, and afterward sanctified by the fires of the Pentecostal Baptism of the Spirit, in like manner has the corruption of this world been washed away by Noah's flood, and hereafter shall be purged from its filthiness, sin and crime by the fires of the final judgment day, which, evidently, draweth near.

Now for a synopsis of the symbolic drama of the THREE Sons of Adam:

FIRST, CAIN, acting out the carnal-minded, fallen nature of man.

SECOND, ABEL, acting out the regenerate, Divine nature, primarily as in the infant, and then as planted in the heart by conversion, which is also called the new birth.

THIRD, SETH, acting out the truly sanctified state of the soul who has genuinely been baptised with the Holy Ghost and Fire, purging out the last remains of carnal Cain out of the soul.

Let us note that ONE of these three personified principles MUST, and DOES dwell in, and dominate the heart, of every son and daughter of Adam's race; and thereby transforms the character of the person thus possessed into the image of either CAIN, ABEL, or SETH, according to the principle of the spirit dominating the soul.

Then let us bear in mind that we cannot remain in the mere state of regeneration, being possessed at the same time with both the spirit of Christ and that of the carnal mind, throughout eternity. Either the carnal mind will dominate and cast out the regenerate spirit, thus confirming us as the children of Cain; or, on the other hand, the regenerate spirit will dominate, and by the incoming of the Holy Ghost, cast out the carnal mind, thus confirming us the children of Seth.

This confirmation must take place in this state of probation, and not after death, for in eternity there will be no children as offspring of Abel, that is, children of God, and yet possessed of the carnal mind.

Dear Christian reader, which will you do: retrograde and go with the children of Cain? or, go on to perfection, and be transformed by the renewing of your mind that you may prove what is that good and acceptable and perfect will of God?

"This is the WILL of GOD, even your sanctification"—1st. Thes. 4:3.

BRINGING IN THE BUCKET.

"O dear!" sighed Mary. "I really must write that letter to Mrs. Norton tonight. It's got to be done this week or there'll be trouble."

"And this is Saturday, if I'm not mistaken," said Uncle Jim, looking up from his newspaper. "In fact, Saturday afternoon. Why not postpone it till tomorrow, if I may ask?"

"Why, Uncle Jim?" cried Mary. "That from you! 'Why not wait till tomorrow?' I should have expected you to say, 'Why didn't you write it before?'"

Uncle Jim had a quizzical smile behind his newspaper. "Well, since you suggest the question, why didn't you write it on Monday—or Tuesday—or Wednesday—or—"

"O, Uncle Jim—" Mary interrupted him. "Do stop! You make it sound so terrible! I've put it off because I haven't felt a bit well this

week; and it's an awfully hard letter to write, and I dread it no end!"

"O, yes." Uncle Jim was politely sympathetic. "Well, I suppose it's a great deal easier to do tonight, of course."

"What in the world do you mean? It's harder, if anything."

Oh-h! Harder? Well, at any rate, I suppose you don't dread it so much?"

"I dread it just as much!"

Mary's voice showed that she was becoming a little annoyed, but Uncle Jim apparently did not notice, and kept on with his questions.

"Then you're feeling pretty well again, are you?"

"I'm feeling tired to death. You know I said so at lunch. What do you mean by all these questions, Uncle Jim? Are you making fun of me?"

But every trace of the quizzical smile was gone from Uncle Jim's face.

"I was just trying to find out," he said, quietly, "just why any sensible girl waits a week about doing something that grows harder the longer she waits, and that she dreads more and more. Besides, the delay makes her every day more and more tired. No, don't shake your head, Mary. You would have felt a great deal better physically as well as mentally if you had got that letter off your hands earlier in the week. Did you ever hear the story about the little boy who was sick with all the symptoms of over-work? The doctor asked how much work he had to do. And they said: 'To bring in a bucket of water every day.'"

"At any particular time?" inquired the doctor.

"Well, he is supposed to bring it early in the morning, but he usually puts it off till the last thing at night."

"And brings it in all day long!" said the wise old doctor. "You make him bring that water in before he has his breakfast, and he'll be all right."

"And he was!"

Mary laughed in spite of herself. "That's all very well for a small boy," she said, "but for a girl as old as I am it's different."

"How much older do you think you are than Mr. Howard Carpenter?" inquired Uncle Jim, with one of his surprising conversational changes.

"Older? Why, Mr. Howard Carpenter is as old as father! What do you mean?"

"Simply that he was the one who told me he used it for a watchword. I was asking him how he managed to get so much done without ever acting tired or showing strain as so many men do, and he said: 'I bring in my bucket of water the first thing in the morning.' Then he explained that for a good many years he had chosen the hardest thing in each day's work, or the thing he dreaded most to do, and had deliberately done that thing first of all—thereby losing neither time nor nervous energy in dreading it. I've determined to adopt the plan, Mary, and I respectfully pass it on to you. And now, since the sermon's over, how about a nice little walk through the park?"

"Thanks, kind sir," said Mary, with a smile, "but that's no bucket. I'm going now to draw mine; better late than never."—Youth's Companion.

A TONIC

Grove's Tasteless Chill Tonic restores Energy and Vitality by Purifying and Enriching the Blood. When you feel its strengthening, invigorating effect, see how it brings color to the cheeks and how it improves the appetite, you will then appreciate its true tonic value.

Grove's Tasteless Chill Tonic is simply Iron and Quinine suspended in syrup. So pleasant even children like it. The blood needs QUININE to Purify it and IRON to Enrich it. Destroys Malarial germs and Grip germs by its Strengthening, Invigorating Effect. 60c.

No Worms in a Healthy Child

All children troubled with Worms have an unhealthy color, which indicates poor blood, and as a rule, there is more or less stomach disturbance. GROVE'S TASTELESS CHILL TONIC given regularly for two or three weeks will enrich the blood, improve the digestion, and act as a general strengthener to the whole system. Nature will then throw off or dispel the worms, and the child will be in perfect health. Pleasant to take. 75c per bottle.

"Say—would you look at that Barney beating it home with two big packages of Kellogg's Corn Flakes? Betcha, Bill, that Barney is trainin' on Kellogg's and us better get him on our team, all right? Gee, maybe he ain't runnin' some speedy. Bet he is a record-smashin' boy—eh?"

Such appetizing, nourishing food  
for the hot days—

Kellogg's  
CORN FLAKES  
they're so easy to digest!

Cut down on heavy food! You'll feel a lot better and get away from that drowsy, sluggish feeling. Eat lighter foods. Kellogg's Corn Flakes are ideal, for they are not only delicious in flavor and appetizing crispness, but nourish and sustain! Kellogg's digest easily and rest the stomach and help keep your head clear and your body cool.

Kellogg's Corn Flakes are wonderful with the fresh fruits now in season; and, as an extra-dessert treat, serve Kellogg's with fresh fruit and plenty of cream!

Kellogg's Corn Flakes are sold only in the RED and GREEN package bearing the signature of W. K. Kellogg, originator of Corn Flakes. None are genuine without it!

Quite a number of the members and friends of the Hondo Mothers Club accompanied a bunch of children to Castroville Monday evening where the children staged the Pageant, "America in the Making," at night. The staging was a success, the musical selections were highly appreciated, and a considerable sum was realized from the net proceeds.

Dr. C. E. Bartholomae and family are now residents of Hondo, occupying the cottage recently vacated by Dr. J. E. Schlottman. Dr. Bartholomae has an office at his residence and is now ready to practice his profession—that of doctor of chiropractic. The family is welcome to our town, and we trust that their residence here will be one of the most pleasant epochs in their lives.

# FLETCHER'S STATE RIGHTS FARMING

## A Monthly Farm and Livestock Journal

Published in Hondo, Texas.

By FLETCHER DAVIS

Subscription, \$1.00 per Year.

The editor was for more than four years an Institute Lecturer for the Texas State Department of Agriculture, then for more than two years an attaché of the Department's Bureau of Markets, during which time he established and edited the Market Journal and the Market Section of the News Bulletin, and for nearly a year had full editorial charge of the Monthly News Bulletin. He has also been a staff writer on one of the State farm papers for more than three years and has contributed frequently to the other State farm papers.

Mr. Davis hopes in his own farm publication to resume his labors for the farmers of Texas which were interrupted when the News Bulletin was discontinued, and hopes also to receive sufficient patronage from the farmers to enable him to render a greater degree of service than he has ever rendered before.

If you want to help him realize his hopes and desires, clip, fill out and attach money order or check to one of the below blanks and mail it to him at once.

- \* When the 37th Legislature's refusal to appropriate funds for the continuance of the Monthly News Bulletin of the State Department of Agriculture caused its demise, its then editor wrote in the farewell issue:

**GOOD-BYE—HOWDY!**  
\* The News Bulletin is Dead! Long Live the State Rights Farmer!

\* With this issue of the Monthly News Bulletin it ceases to exist—done to its death by a spiteful membership of the State Senate!

\* But it is not my purpose to mourn its demise. For seven months I have edited the News Bulletin at a financial loss to myself because of the pitiful wage paid by this great State to its servant. But I have done it because of its exceptional opportunities for service and because the work was a labor of love.

\* With the passing of the News Bulletin, it dies in body alone. Its spirit is re-incarnated in the State Rights Farmer, born, without hope of pecuniary reward to himself, of the unselfish desire of Commissioner Terrell to continue the valuable service heretofore rendered by the News Bulletin. In the columns of the new publication, unhampered by official restriction, I expect to find a broader and fairer field for service than was possible in the older.

\* Good-bye, readers and friends of the News Bulletin. To those who want to be readers and friends of the State Rights Farmer, Howdy! And let's go!

\* Yours for continued service, FLETCHER DAVIS, Editor Monthly News Bulletin.

\* The State Rights Farmer mentioned therein failed to materialize for various reasons. Mr. Davis resigned from the Department and returned to his own publishing business, and after surmounting many difficulties, has launched, on his own responsibility and from his own printing plant,

\* Fletcher's State Rights Farming.

\* Many of those whose names made the News Bulletin served, to mention the thousands of farmers they were trying to but had not yet reached, will come to his support with their subscriptions and their advertisements they will make his paper a financial success and broaden its scope of usefulness far beyond the dreams of the state publication.

\* Won't you who read this be of help in realizing these hopes by sending him your subscription now. Get three of your neighbors to join you—NOW. Don't wait for a second invitation. We thank you—NOW!

# SOUTHERN PACIFIC ANNOUNCES POLICY OF NEWLY ORGANIZED AGRICULTURAL DEPARTMENT.

The Southern Pacific Lines, recognizing that Agriculture is our basic industry, and that without a prosperous farming community we cannot of ourselves prosper, have recently created an agricultural department, and employed an agricultural agent, in order to stimulate and promote the farmer and his enterprises along these lines.

The American farmer produces more per man than any other farmer in the world, but in so doing he is the most extravagant in his use of land. It has been the common tendency to plant the same crops year after year on the same ground, paying out the plant food nature has so kindly placed at his disposal, with no thought of the morrow. But such a state of affairs can not go on indefinitely. If we expect to increase or even maintain our best yields we must replete the gradually decreasing plant food in the ground. The most common way, the quickest, but unfortunately the most expensive is by the use of commercial fertilizers. However, we have another method equally as good, but not quite so quick in results, but much less expensive, and giving more lasting results, in plowing under green manure crops. Such a crop, especially a legume, adds its fertilizing value, including nitrogen, and also by the addition of organic matter with its attendant humic acid, improves the texture and quality of the soil physically, and at the same time by its chemical action makes available certain plant foods that were before in an insoluble form.

In addition to the use of fertilizer, we must more intensively cultivate with improved cultural methods, and practice scientific crop rotation, to increase our yield per acre. The yield of some crops in certain places has become so low that we must plant new crops that have proved successful under similar soil and climatic conditions elsewhere.

On these so called run down farms, live stock is always instrumental in restoring their past fertility. Dairying, when well bred high producing cows are kept, always returns a fair dividend, coming in daily. Such cows, unless bought at a high price, can only be obtained through using first class pure bred bulls, generation after generation. If the largest returns are expected from a dairy cow, some care and attention must be given to see that she is properly fed and kept. Unless she is given a balanced ration, she cannot be expected to produce to her maximum capacity.

There is a place on every farm for a few good hogs, a few beef cattle, and some sheep. All of these do not have a so called bad year at the same time. With care and attention they are all willing to help the farmer on the high road to success.

Very few of our farmers pay much attention to the common old hen. Yet today she ranks right at the top of all money-making farm producers. In 1919, in Texas alone there was \$38,190,568.00 worth of poultry and eggs produced, and of this amount \$11,888,162.00 was actually sold by the farmer. If the average

farmer would discard his roosters, except for eggs, for hatching purposes, thus producing infertile eggs, and then use a little care in grading and selecting these eggs for market, a few hens would not only keep his current bills paid, but keep him with a balance in the bank. There is no profit in keeping a hen that doesn't pay her board. If she is a non-producer, ship her to market. Any county agent can show you how to distinguish between a hen that lays and one that doesn't.

The Southern Pacific is desirous of settling its idle lands with real farmers. We are opposed to land speculation by non-residents and non-producers. Land in the hands of owners who show no desire to improve it is a deadweight to any community. If every farmer owned his own farm, which should be every farmer's desire, we would have no tenant farmers, nor its attendant evils. We are anxious to help every tenant farmer own his own farm.

We need new enterprises developed all over our state, that are dependent on and furnish a market for agricultural products. Our raw material should not have to be carried north to the factory and then shipped back to us a finished product. We need to finish it here.

The Agricultural Department of the Southern Pacific Lines is ready and more than willing to co-operate with every agency that is working to help the farmer. There are a number of government agencies, such as the Extension Service of the A. & M. College, the State Department of Agriculture and the United States Department of Agriculture, actively engaged in helping the farmer help himself. We hope they will welcome our efforts along the same lines.

We know that we can be of help, and we will help, in regions of crop failures and low production, due to insect pests and plant and animal diseases. It is in such places that we are interested, first in helping the farmer get on his feet. It may be he needs to change his crops, or his system, or that dairying would be his salvation. We want to help him diagnose his trouble and apply the remedy.

The Agricultural Department of the Southern Pacific proposes to keep accurately informed of crop conditions, crop estimates, rainfall, and other data affecting growing crops and from time to time publish this data for the benefit of those who can use it.

We want to encourage the farmer to greater individual effort to help himself by showing and proving that we are with him and behind him. We want to see his yield increased, his net returns from the products he sells increased. We want to help him fight and control his insect pests and his plant and animal diseases. We want to understand the farmer, and we want him to understand us. We want to promote a more friendly relationship between the farmers along our lines, and their railroads.

The prosperity of our railroads depends upon the prosperity of our farmers, and it behooves us to use all the power at our command to support the farmer in his fight for that prosperity. We are working toward the same end, and we are going to work together. Our ultimate success

depends upon the service we can render. We cordially invite the co-operation of every agency working for the betterment of the agricultural industry. The Southern Pacific Lines fully realize that in helping the farmer that they are in the long run helping themselves, and that by striving to help the farmer to prosperity, we are bringing prosperity to the railroad. We are here to do service to the farmer, we want him to use us. We propose to develop all the means at our command to

help the farmer, by demonstration by education, and by transportation. Announcements will follow from time to time of our programs.

J. I. MCGREGOR,  
Agricultural Agent.

## WOULD EDUCATE THE CHAMBERS OF COMMERCE

Because a merchant is well up in his own business does not mean always or often that he studies or understands matters relating to government and economics which have important bearing upon the general welfare, or indirectly upon his own business.

Generally speaking, the business interests of the smaller cities and towns are friendly to the farmers of their communities, and often show commendable tendency to help them with their problems of insect control, etc. The case of the El Paso Chamber, mentioned somewhere in this issue, was in point.

While indirectly it was expected that the city would receive benefit from some knowledge and some remedy for unfavorable soil conditions in the Valley, it was well understood that the first and most direct benefit if any, resulting from the action of the Chamber, would go to the irrigation farmers.

There is in short, not so much reason for complaint that the business interests of the cities and towns, supposed to be represented by their Chamber of Commerce organizations, manifest unfriendly attitude toward the farming interests, in their closer relationship to these interests. Indeed, numerous examples are in evidence all over Texas that the contrary is more nearly true.

What I complain about, and what the farmers complain about, is that the Chamber of Commerce influence, even of the smaller cities and towns, by the collective influence of its

members, and to great extent by the individual votes of its members, back men and measures at deadly variance with the welfare of our agricultural producers.

Numerous instances might be given where the Chamber of Commerce, as to such matters, is nearly always cross-ways with the interests of the farmers, as they are affected by the various governments, or by administration of them. More often the trouble is in the administration. The Federal Reserve system is a case in point.

The trouble with the Federal Reserve system is not so much with the system as with its administration. In the hands of the agents of Big Business, the Federal Reserve Banks, by raising the discount rate, and declining to re-discount the paper of member banks, caused the loss of billions of dollars to American agriculture, and the actual damage was done in four months' time, though the resultant suffering still goes on.

Without the backing of the United States Chamber of Commerce, and nearly all the more or less smaller Chambers and the "kept" press of the country, this outrage could never have been put over, and that is what I am kickin' about; and that is why the farmers are going into politics, and why the city and town people had better get in with them; or at least cease fighting their interests. After all, do the Chambers always, or nearly always, "real an' truly" represent the business people of our smaller cities and towns?—Claridge.

## TEXAS COTTON CROP SHORT---SHOULD BRING HIGHER PRICES

The last cotton crop report issued by this Department on August 1 gives 10,196,000 acres of cotton in this State, compared with the government's estimate of 12,312,000 acres, which I know to be too high, because the first estimate of the crop of 1921 by the government was 9,199,000 acres, and there is only about eight or ten per cent increase this year. Our reports were made from correspondents in 221 counties. They were made by presidents and secretaries of Farmers' Institutes, Farm Demonstration Agents, County Commissioners, Bankers, Merchants and individual farmers, and were verified as far as possible by our field men. This report indicates a condition of 71.4 per cent of normal.

The yield in 1921 was 100 pounds of lint cotton per acre. The condition of the cotton on August 1st indicates a yield of 135 pounds of lint to the acre, or a little more than one-fourth of a bale per acre. This indicates a yield of 2,752,920 bales for Texas. Reports reaching the office since the above report was made show severe damage by drouth and hot winds, causing cotton to shed its fruit in all the western part of the state, and continued damage by boll weevil in other parts of the state, and serious damage by the leaf worm in the eastern part of the state. From these facts I am afraid that the yield will be reduced below my expectations. No more poison can be had to fight the boll weevil and leaf worm, and the damage will continue unabated.

Recent reports from the Commissioners of Agriculture of the cotton growing states indicate great damage by boll weevil and a yield no greater than last year. The maximum crop will be less than 11,000,000 bales, or 2,000,000 bales short of the world's needs. The mills must run on short time before the crop of 1923 is made. The present short crop warrants a price of 25 to 30 cents per pound for this crop, and nothing short of a conspiracy to bear the price can keep cotton at the present low price. The cost of producing this crop is above 20 cents per pound. The cost of production and a reasonable profit must be received or the cotton industry of the South is doomed.

FARMING MUST PAY OR THE NATION WILL PERISH.

Respectfully,  
GEO. B. TERRELL,  
Commissioner of Agriculture.

"How Was the Farmer Saved," screams the New York Journal of Commerce. Then it proceeds to explain that "the farmer got on his feet by the process of liquidation of stocks, prices and costs." Having taken a loss of several millions through this process of "liquidation," the American farmer must be about as wobbly on his feet as the man who first stands up after being sand-bagged. But what is that to Wall Street, spokesman for which the Journal of Commerce is? Suffice it for him to be up again; the sooner will he be Wall Street's meat again.

## FLETCHERIZED FARM FACTS

By THE EDITOR.

ing infected premises and vaccinating exposed animals has up to this writing (the middle of August) prevented a general epidemic in any locality,

and it is not thought that there will be any serious spread of the disease.

In view of its almost simultaneous appearance at so many different

points, its distribution over so wide a section of our state, and the deadly virulence of the disease, it behooves every owner of live stock to familiarize himself with the symptoms of the disease, and be on the alert for its appearance. As no successful method of treatment for the ailment has been devised, prevention is the only means of protection against it.
